

UNIT FOR SUCTION AND FILTRATION OF DUST FROM GRINDING, SHARPENING, DEBURRING, POLISHING AND CUTTING.

CARFILTER

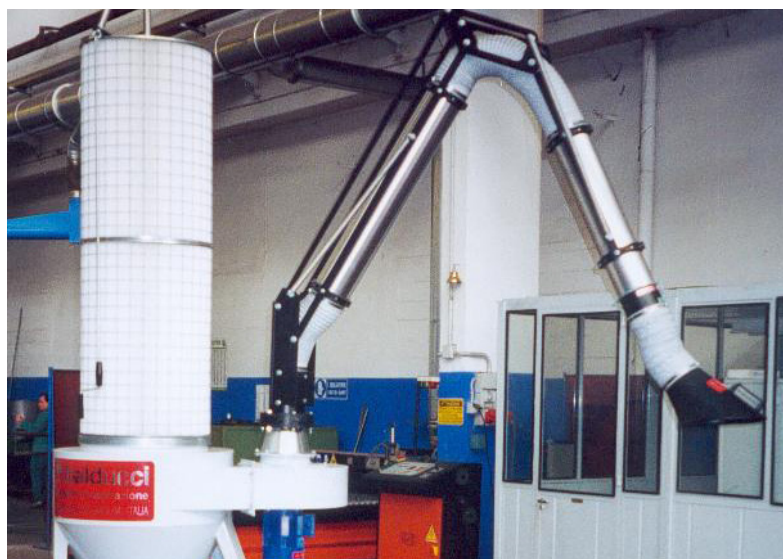

The "CARFILTER" suction and filtering unit with a cartridge of 14 or 21 m² of filter surface is the simplest and most reliable solution to the problem of dust from grinding, deburring, polishing, cutting metals and other materials and chips.

The unit can be equipped with different motors and several accessories such as:

- polyethylene sack
- metal chip container
- carriage
- suction arm
- flexible tubes
- or motorised cleaning system
- cartridge cover.

Employee health is guaranteed in compliance with current regulations (Leg.D. 81/08) on the quality of air in the workplace. The filter cartridge type SF.806 is made in polyester and has an efficiency rating of 99.92%, according to tests run periodically on the filtering medium by B.G.I.A. (Berufgenossenschaftliches Institut für Arbeitssicherheit), the German Interprofessional Institute for Workplace Safety.

Dimensions of the Carfilter 1300 base unit: mm 1200 x 750 x 1400 H; weight Kg 80

ATTENZIONE: la normativa vigente prevede, per le emissioni "tecnicamente convogliabili", esclusivamente l'espulsione all'esterno. Contattateci per maggiori informazioni.
